

TMA Freshwater Fishing Tournament - RULES

Registration

All tournament registrations must be entered and paid for via MastersAcademy.org/fishing. Anyone who joins the tournament app without having officially registered and paid via mastersacademy.org/fishing will be removed from the app and not able to receive prizes.

FishDonkey App

All entries must be completed using the App. The App will be used to photo document fish and will generate live leaderboards. The leaderboards will update throughout the event as fish are submitted. All entries will be considered unofficial until verified.

Multiple devices/phones may be logged into the same account at any given time. If multiple people on your family/team would like to help record fish and/or view the leaderboard through the app, the person who registered your team can share their user/password with other members. Once they share the user/pass, you will need to download the app and log in with those same credentials.

TIP FOR FAMILIES: To reflect a family/team name in the leaderboards, tap on your profile icon and change your first/last name to a team name. (Example: First name: TEAM, Last name: SMITH). Each entry will then show up as TEAM SMITH, but the pictures will reflect the person who actually caught the fish. You can even insert a photo of your family/team in the profile picture if you'd like.

It is wise to designate one person to record the fish for the entire team to maintain consistency.

Alternatively, students who are registered with their family may create their own user account within the app at the discretion of the parents. This would be the only way for the "Name" on the leaderboards to reflect the individual student's name.

Sharing pictures: All photos taken through the app will place a copy in the camera photo deck. Share with your team!

Measuring & Photo Documenting

All photos must be taken through the FishDonkey app and measurements must be on a valid measuring board.

Fish should be recorded immediately and measurements noted by length.

All submissions must include at least two photographs:

- 1) A pic of the person who caught the fish holding it in the picture (person's face and fish visible)
- 2) A pic of the fish on the measuring board clearly showing the measurement, nose against bump and tail on the open end of the measuring board

Close the fish's mouth. The nose should touch the bump of the measuring board (the belly is facing you). The measurement photo needs to include the entire fish on the board.

If the fish tail is touching the graduation line on the board then that is the exact measurement. If the tail crosses a graduation line, round up ¼".

All participants must have their fish submitted before the end of the tournament.

Practice the FishDonkey App ahead of time

[Watch a 1 minute tutorial on How to Enter a Fish](#)

Test the app before you get out on the water.

1. Download the app
2. Join "Practice Entering a Fish"

FishDonkey in poor reception areas

The app will work without the internet. Open the app before heading out to poorly covered areas. Tap on the name of the tourney. Once you see the button 'Enter a Fish', head out and fish away. Fish should be entered as normal in bad reception areas. Your Digital Livewell® (fish icon) will show you if there are fish waiting for an internet connection to get pushed into the leaderboard. When you get back to a well connected area, open your Digital Livewell® and leave that screen open/active until all fish are "Received". If your pictures are missing from the leaderboard, this is what you need to do. Until your pictures are received, do not delete or alter the photos on your phone, as the software will not accept your photos as originals.

Missing pictures on the leaderboard?

Open your Digital Livewell (fish icon on the top of the app screen) when you get back to an area with good reception. Leave that screen open until all fish are "Received". Never delete anything from your Digital Livewell.

Measuring Boards

All measuring devices must be commercially made. You are required to have a board with a 90 degree bend which marks 0, and at least ¼" lines. No handmade measuring boards, stickers, or tape measures allowed. No sliding, retractable, or foldable measuring devices are allowed unless approved by the tournament director. If your measurement is not clearly readable in your submission photo, it may not be accepted, or could be penalized.

Panfish Definitions

Many species fall into the category of "Panfish". Here is a common list found in Florida, but others may be found and/or accepted:

Bluegill, Crappie (aka. spec or speckled perch), redear sunfish (shellcracker), flier, longear sunfish, mud sunfish, shadow bass, spotted sunfish (stumpknocker), warmouth and redbreast sunfish

Stringer Info

A "Stringer" of fish (a.k.a. Bag of fish) is just a way of entering multiple fish caught in the same species. Only Bass will have a "stringer of 3" category for this event. Each fish should be recorded one at a time, as they are caught. The app will auto-cull for each team. It will toss out smaller fish once stringer capacity is reached.
